Andres was a happy yet not so successful boy. Once he went hunting he killed 9 Buffalo, 8 Fish, and 19 raccoons. But when they started to hit the hay he saw 1 moose and 1 deer who can talk. He went up to them and... HE SHOT THEM! Then he saw 3 girls Melody, Maria, and Madison and... SLAUGHTORED Them. Then he saw two raccoons and... He became these friends. The raccoons couldn't talk but using hand jesters they made fun of Andres. So you know what Andres did?

He killed them, then Robert and Lucas came by and you know what Andres did? He became their friends. And Andres lived happily but not as successfully ever after. Also and Andres LOVED cheese cake.
Threat Assessments

- Review CFS – victim/witness/subject
- Review criminal history
